

The background of the entire page is a black and white aerial photograph of a city at night. The city lights are blurred into long, white light trails, particularly on the roads and highways. Overlaid on this image are several glowing white arcs that connect various points across the city, resembling a network or data flow diagram. A large red rectangular box is positioned on the left side of the image, containing the main title text in white.

OpenConnect

Applied Payments Intelligence

FEXCO Merchant Services offer reliable, robust and future proofed transaction solutions, providing the ultimate in flexibility when it comes to your transaction service needs.

At the heart of our Transaction Services offering is the FEXCO OpenConnect Payment Platform.

OpenConnect utilizes the latest payment switching and transaction integration technology bringing together sources from both physical and remote environments to a range of transaction destinations – a completely flexible omni-channel solution.

OpenConnect's transaction integration framework provides an expedient means of enabling Dynamic Currency Conversion (DCC).

An end to end payments platform

Features

Integrated Dynamic Currency Conversion (DCC) Functionality

As the originator of DCC Services, our OpenConnect Payment Platform comes with Integrated DCC functionality allowing our customers access to new revenue streams.

Multi-Currency Pricing (MCP)

An e-commerce payment solution that allows your customers to browse and pay in their preferred currency.

Globally Connected

Connection of payment accepting devices to an extensive worldwide network of local and international card acquirers & schemes.

Opening Connections

The OpenConnect Payment Platform allows payment and other transaction messages to be converted from one protocol and/or message format to another.

Transaction Devices & Support

Provides a focal point for a range of transaction types both face-to-face and eCommerce delivered from a broad range of EPOS-connected, counter POS and mobile POS as well as kiosks and other unattended payment devices.

White Labelling

OpenConnect can be provided on a fully white-labelled basis.

Integration

FEXCO's ability to adapt existing interface standards of acquirers and value added service providers ensures expedient and trouble free solutions can be delivered with rapid integrations and little or need to for changes to existing 3rd party systems.

Highest levels of Security and Compliance

OpenConnect is fully PCI-DSS and EMV compliant, migrating risk away from our clients. It features the latest technology in security and data protection.

Real Time Reporting and Insights

Secure access for acquirer's clients to transaction reporting and monitoring.

Bespoke Interfaces

FEXCO can develop scheme and acquirer interfaces to suit specifications on an individual basis.

24/7 Support

Worldwide 24/7 operational support is provided by the in-house FEXCO Operations Team

Benefits

Device and System Neutral

A fully self-sufficient services and solutions partner who is vendor-independent and impartial to providers of PoS devices and other services.

Proven Track Record

Proven track record in delivering and operating secure, flexible and fault-tolerant payment systems.

Global Network

Global network plus local offices and staff with market knowledge and expertise, focused on building long term client relationships.

Solutions that deliver value

Providing solutions which deliver value to acquirers and merchants and strengthen the acquirer/merchant relationship.

Cross-Border Expertise

With unequalled knowledge of cross-border and FX payment transactions, FEXCO supports a range of F2F and Ecommerce payment facilities to meet the international transaction requirements for acquirers and merchants.

Additional Value

DCC provides acquirers with a market-competitive service which is valued by merchants

Expedient DCC enablement in EPOS Solutions

OpenConnect's Framework provides an expedient means of enabling DCC in EMV/PCI DSS-complaint EPOS payment solutions eliminating the need for changes inPoS/PED card payment applications and merchant EPOS software.

Future Proofed

OpenConnect is continually enhanced adding new features and connections.

Increased Revenue

Generates additional revenue stream from existing international credit card transactions.

Guaranteed DCC Revenue Sharing

OpenConnect's fully managed treasury solution guarantees the merchant their agreed commission. DCC Revenue share offsets merchants costs for equipment and PCI compliance.

Zero FX Risk

FEXCO can manage and protect acquirers from FX risk.

Modular & Flexible

The platform operates on a modular basis and can be customised and unique to customers circumstances.

Improved Customer Service

Merchants can offer an enhanced sales experience for their international customers

Tailored & flexible

Global end-to-end Payment Solutions Infrastructure

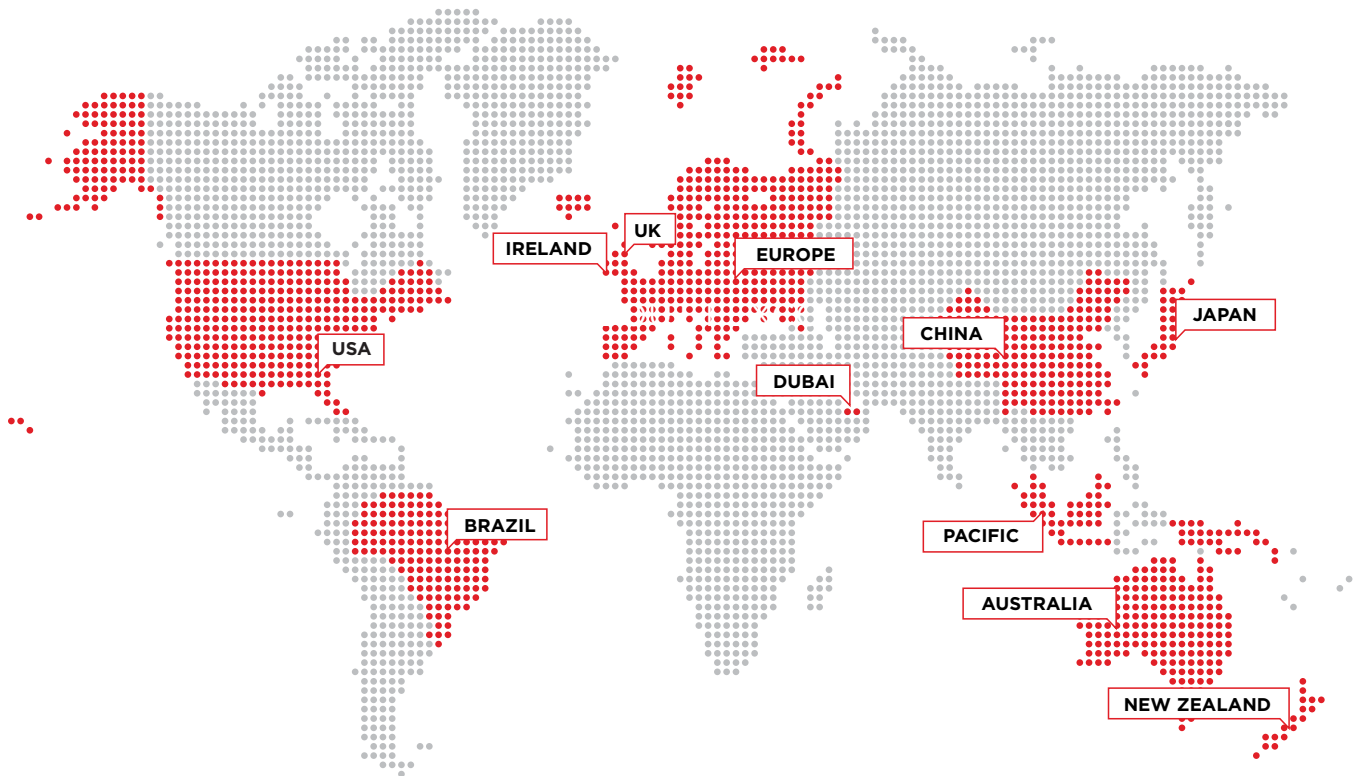

OpenConnect offers a complete end-to-end payment solution for merchants, acquirers and card schemes.
